Never let any superfluous details distract you

Active adjustment, Worthy of trust

Active adjustment, Worthy of trust

New driver for efficient office  
This is our original patented product that makes selection and use easier.

Drive 1: If a worker wants to do a good job, he must first sharpen his tools.  
Drive 2: You can feel the communication between a good chair and your body.  
Drive 3: Health is the greatest welfare of employees

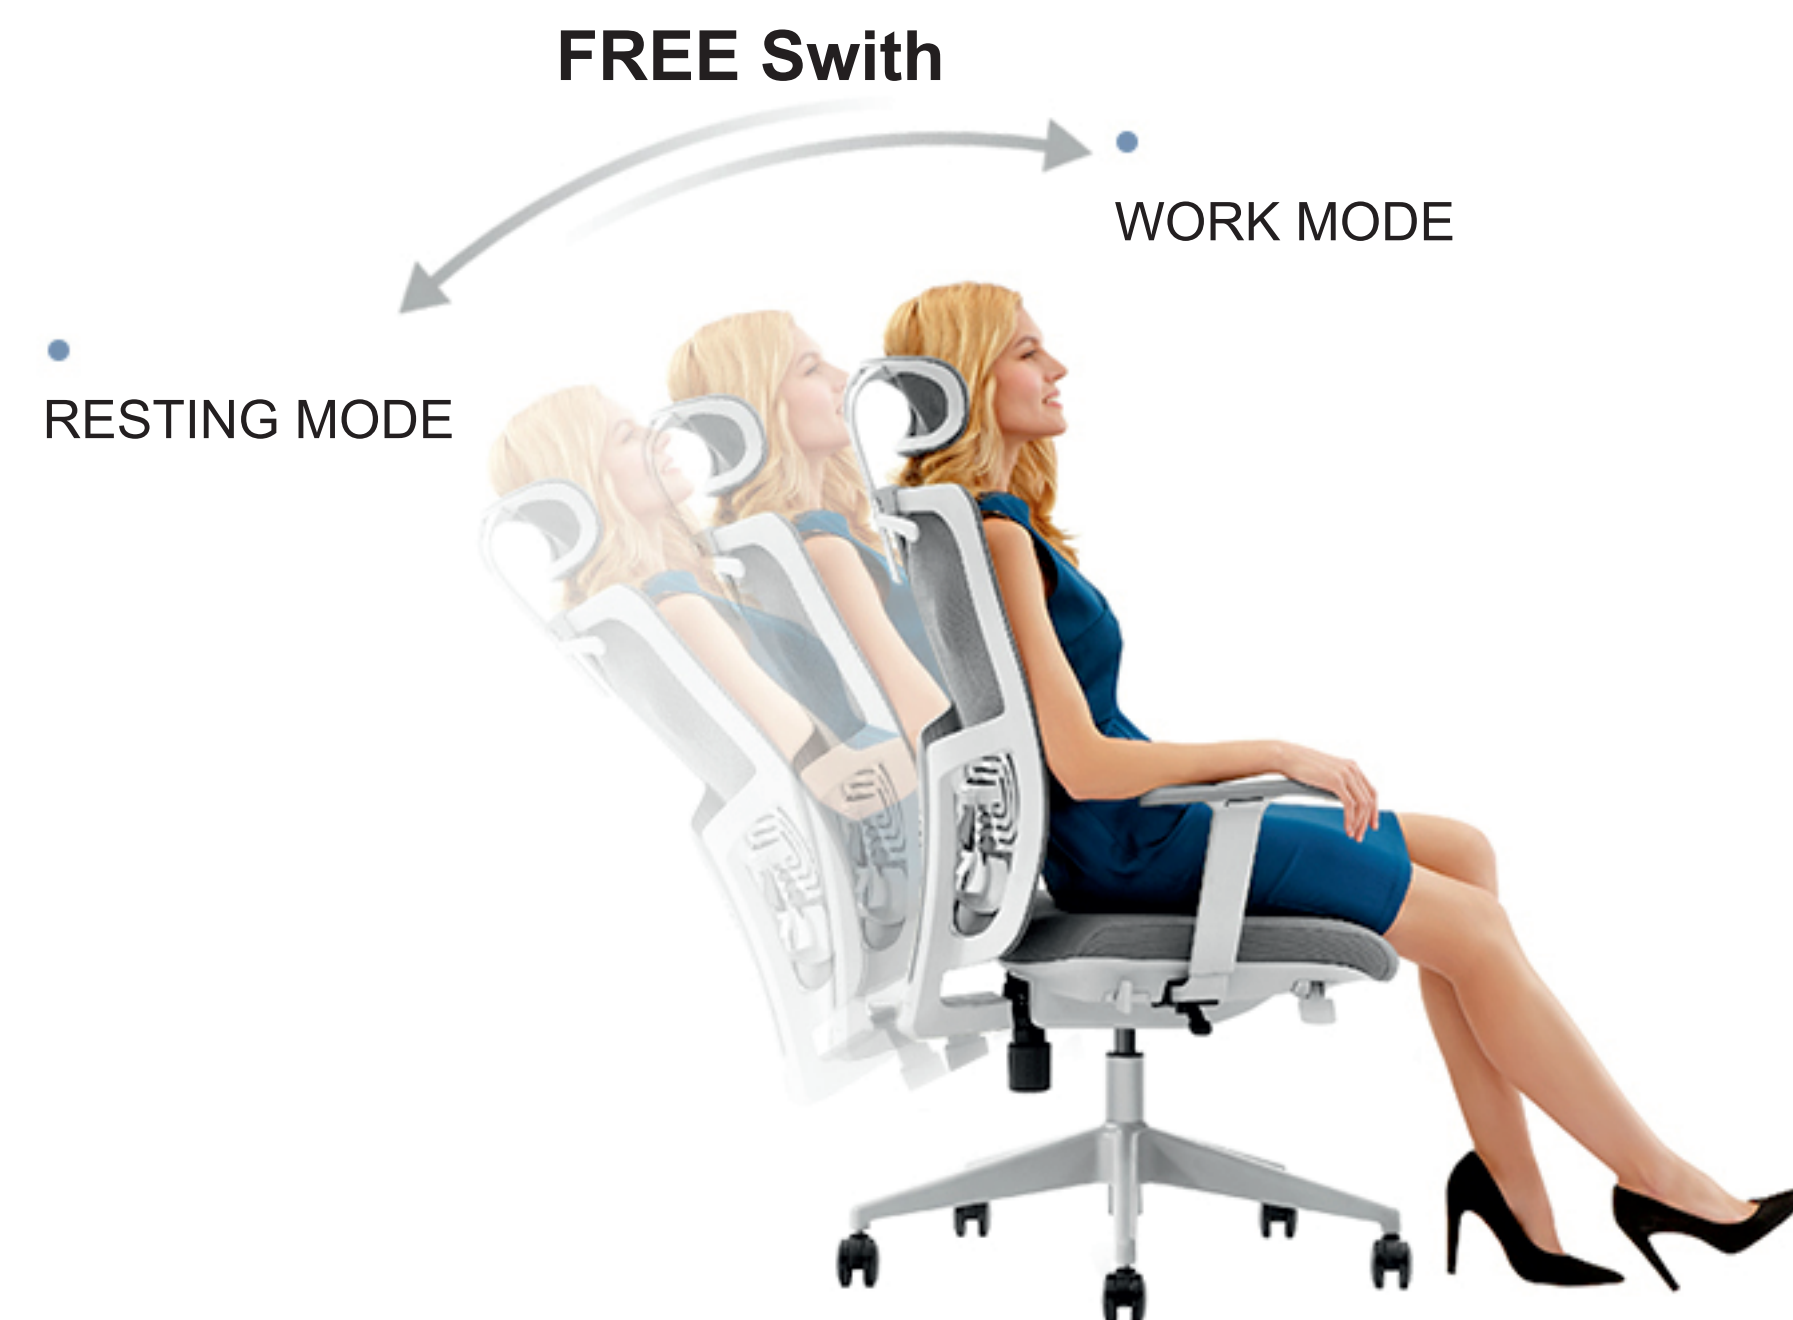

Smart chairs breathe

- The special fabric design of LUMBAR is completely consistent with the color of the chair body, with good air permeability, high elasticity and comfort, allowing heat transfer and moisture to leave the skin surface, and it is not easy to deform after sitting for a long time.
- One-key control lift  
No need to bend over, just one click
- The LUMBAR active adjustment chair is mainly gray, which matches the modern office style, showing vitality in calmness, and conveying wisdom in agility.
- Bionic concept, active fit to the spine, make the health membrane more natural.
- The 6cm High adjustable armrest is designed to have 3 levels of adjustment  
The 6CM high adjustable armrest design has a lifting adjustment function to meet the needs of different users, helping both arms to work continuously.

## Active and body-friendly backrest

Through the unique design of the backrest and seat cushion of the chair, it can improve the health pressure caused by long-term sitting, relieve the long-term sitting injury caused by the waist, use the latest materials, manufacturing and technology, after careful thinking and repeated tests, Bringing you more comfort and more ergonomic support for unprecedented smart performance. So that you

Our LUMBAR Active Adjustable Chair has a unique design that shortens the seat surface of the chair, prompting people to actively and effectively lean forward while working, and distributes the center of gravity from the thighs to the spine and hips, so that the body is supported by the backrest and seat.

## Ridge-shaped bionic backrest

The ridged backrest designed with the help of the dynamic model of the human body is exactly the same as the human spine. A tighter fit helps relieve spinal pressure.

By enlarging the arc of the seat back corresponding to the lumbar spine, it forms a perfect support for the waist, which not only stabilizes the sacrum but also supports the lumbar region of the spine. provides complete spine stability from the sacrum to the thoracic region, and naturally adapts to the entire S-shape of the spine, reduce the discomfort caused by prolonged sitting.

## Use 4-stage gaslift

The lifting is more stable.

## Smart chairs breathe

The special fabric design of LUMBAR is completely consistent with the color of the chair body, with good air permeability, high elasticity and comfort, allowing heat transfer and moisture to leave the skin surface, and it is not easy to deform after sitting for a long time.

Special GT mesh for seat back, high strength, flame retardant, does not contain any heavy metal components. LY special fabric for seat surface, waterproof, flame retardant, no longer worry about the residence such as water burst.

## Foam and plywood are integrally formed

Using one-piece molding technology, no glue is more environmentally friendly. One-piece foam is evenly worn and comfortable to sit for a long time.
